Assignment10-MIT3206-22550119

Assignment 10 : Using Google Maps for Android

Below is a summary of what I have learned and focused on in this assignment.

1. Android Components

- **API level**

Android Version	API Level	Version Name
Android 7.0	24	Nougat

- **Common Methods for using in Maps**

No	Method	Description
1	fetchLocation()	This method returns the currently displayed user location.
2	onRequestPermissionsResult()	This method is used in Android that is called when the user responds to a permission request.
3	onMapReady()	This function is called when the map is ready to be used.
4.	buildGoogleApiClient()	This method is used to initialize the Google Play Services.

- **Permissions**

- uses-permission - Access INTERNET
- uses-permission - ACCESS_FINE_LOCATION
- uses-permission - ACCESS_COARSE_LOCATION
- uses-permission - ACCESS_NETWORK_STATE
- uses-permission - ACCESS_BACKGROUND_LOCATION

- **Special Requirement**

meta - data - com.google.android.geo.API KEY

API Key & Value - "AlzaSyCqbaEAhGHV1IC21U8Hj0dHxwi90koZehM"

An API key is needed to access the Google Maps servers.

- **Newly learned key points in this assignment**

- How to get Google API Key
- Working with Map activity

- **Dependencies**

Dependencies in the build.gradle (:app),

- implementation libs.play.services.maps
(implementation 'com.google.android.gms:play-services-maps:19.0.0')
- implementation libs.play.services.location
(implementation 'com.google.android.gms:play-services-location:21.3.0')

- **tools:targetApi="34" in AndroidManifest.xml**

- **uses-feature android:name="android.hardware.touchscreen"**

- **android.enableJetifier=true in gradle.properties**

2. Functionality of the mobile application

- A Location Client to provide location services
- A MapFragment to laying out Android content and display maps
- Develop an Android App which accepts a location or the Place
- Display the relevant map on the screen

3. Running the Application on my android mobile device

I was running the android app for testing in my android mobile device.

My android mobile device is Realme X2 RMX1993.

Below is a Screenshots of my android mobile device (Realme X2 RMX1993) while the app was running.

Photo 1 : Assignment10-MIT3206-22550119 in Realme X2 RMX1993
